

To Whom It May Concern:

I am writing in regard to MB Docket #04-233 to advise that I do not wish to lose Air1 radio which is currently heard in my city via an FM Translator Service. Air1 plays contemporary Christian music and I know of several young people and adults that receive great joy & encouragement from the station's programming. If Air1 were to be displaced by an LPFM broadcaster providing other programming, we would lose the only station we now have available for this positive alternative. As much secularism as we are currently subjected to via TV, Radio, & etc., it would be a great disservice to my community to lose a station that provides programming that supports wholesome values and that has such a positive and encouraging impact on its listeners.

In addition to being an Air1 listener myself, I am a parent of a 15 year old boy and it is a great relief to me that he has an option to hear the style of music that he enjoys but with a message of service to God, sexual purity, standing up for the truth, and etc. I do not want this option taken away from my son and his friends. Please do not give priority to LPFM over FM translator service.

Respectfully,
